1) Enhancement of the anionic dye adsorption capacity of clinoptilolite by Fe<sup>3+</sup>-grafting.

Akgül M.

J Hazard Mater. 2013 Dec 27;267C:1-8. doi: 10.1016/j.jhazmat.2013.12.040. [Epub ahead of print]

2) Neuroprotective Actions of Clinoptilolite and Ethylenediaminetetraacetic Acid Against Lead-induced Toxicity in Mice Mus musculus.

Basha MP, Begum S, Mir BA.

Toxicol Int. 2013 Sep;20(3):201-7. doi: 10.4103/0971-6580.121666.

3) Environmental occurrence, origin, physical and geochemical properties, and carcinogenic potential of erionite near San Miguel de Allende, Mexico.

Ortega-Guerrero MA, Carrasco-Núñez G.

Environ Geochem Health. 2013 Nov 24. [Epub ahead of print]

4) Advanced regeneration and fixed-bed study of ammonium and potassium removal from anaerobic digested wastewater by natural zeolite.

Guo X, Zeng L, Jin X.

J Environ Sci (China). 2013 May 1;25(5):954-61.

5) Radiation-modified natural zeolites for cleaning liquid nuclear waste (irradiation against radioactivity).

Yeritsyan H, Sahakyan A, Harutyunyan V, Nikoghosyan S, Hakhverdyan E, Grigoryan N, Hovhannisyan A, Atoyán V, Keheyan Y, Rhodes C.

Sci Rep. 2013 Oct 9;3:2900. doi: 10.1038/srep02900.

6) Increasing performance in children with ADHD by trapping lead with a nano-zeolite.

Delavarian M, Hassanvand A, Gharibzadeh S.

J Neuropsychiatry Clin Neurosci. 2013 Winter;25(1):E23. doi: 10.1176/appi.neuropsych.12010014. No abstract available.

7) Gold nanoparticles as efficient antimicrobial agents for Escherichia coli and Salmonella typhi.

Lima E, Guerra R, Lara V, Guzmán A. Chem Cent J. 2013 Jan 19;7(1):11. doi: 10.1186/1752-153X-7-11.

8) Competitive adsorption of dyes and heavy metals on zeolitic structures.

Hernández-Montoya V, Pérez-Cruz MA, Mendoza-Castillo DI, Moreno-Virgen MR, Bonilla-Petriciolet A.

J Environ Manage. 2013 Feb 15;116:213-21. doi: 10.1016/j.jenvman.2012.12.010. Epub 2013 Jan 12.
